

ANTEKAD SDN BHD

**Production
boards/pallets
for concrete
industry**

Board made of tropical hard wood with a density of approx. $1,000\text{kg/m}^3$, with a thickness of 30, 35, 40, 45, 50 or 55 mm, tongued and grooved single planks joint with 10 mm threaded tierods and with galvanised self-securing nuts DIN 985.

The planks are sawn from logs of large diameter, without knots, high mechanical stability, good wear resistance, excellent vibration properties, long life exception resistance against acids, alkalis and fungus.

End of pallet are protected with a galvanized C-Profile fixed with 6mm diameter mild steel rivets. The boards are four side planned to accurate width and thickness and have minimum tolerance.

Technical and Financial advantages of ANTEKAD SDN BHD Hardwood Pallets

- 1 Shorter vibration time.
- 2 Higher productivity of plant.
- 3 Stone will get more dense, stronger, resistance against freezing temperature.
- 4 Pallets can last 8-10 years.
- 5 Can use thinner Hardwood pallets compared to softwood and have higher load bearing capacity.
- 6 Modul of Elasticity about $20,000\text{ N/mm}^2$.
- 7 Saving of about 10% cement due to better vibration.
